After registering on Ur forum, activation letter was sent on my mailbox (on gmail), but received in Spam box!

None spam filters or any options was changed. I don't known why it take place... Any ideas, or I stand alone with this kind of problem?

some new sites such as vba-m.com will register as unknown so your best bet is to register it as not spam. Any future email from this site will then no longer be flagged as spam :-)
